

## BoMill AB is streamlining its market communication with English as primary language

**BoMill AB (“BoMill” or “the Company”) announces that the Company has chosen to streamline its market communication and will only provide press releases and interim reports in English. BoMill’s annual reports will be published in both Swedish and English.**

BoMill is a company operating on a global market. The decision to streamline the Company’s communication, making English the primary language, is in line with the Company’s ambition to increase its focus on sales growth in North America, Europe and China during 2020 and 2021. The decision was taken in consideration of the fact that BoMill’s customers, network of distributors and partners are located in Europe, North America, and Asia. The Company’s website is already in English only and will continue to be an important platform for communication with both investors and customers on all key markets.

*BoMill has developed and marketed a patented technology for sorting grain on a large scale, based on the inner qualities of each kernel. The method is the only one of its kind on the market today and is deemed by the board to have potential to become a so-called Golden Standard. The Company operates in several markets and has sold sorting equipment to a number of reputable companies in the grain industry.
