BOMILL TO PRESENT BOMILL INSIGHT AT IAOM EXPO IN MINNEAPOLIS

Swedish company BoMill AB is set to present its new individual grain sorting equipment BoMill InSight™ at the International Association of Operative Millers (IAOM) Annual Conference and Expo on April 17-21 in Minneapolis, MN, in collaboration with its partner Bratney Companies (Booth 309).

Launched in January 2023, BoMill InSight™ is the first equipment of its kind, capable of sorting individual grains on their inner properties such as protein content or fusarium contamination, and at large industrial capacity (up to 15 metric tons per hour – 125,000 kernels per second).

With the example of the recent order from leading European milling group GoodMills, BoMill InSight™ offers flour mills a solution to optimize their wheat supply, based on protein segregation, while enhancing the quality of their products.

Versatile - Its revolutionary modular approach offers maximum flexibility for operations and easy upgradability.

Compact -The smart frame design and compact footprint allow easy and rapid installation for retrofit or new grain processing lines.

Cost-efficient - With its economic installation, operation, maintenance and upgradability, BoMill InSight™ is also cost-efficient, allowing fast return on investment to customers.

BoMill will introduce BoMill InSight™ to the American flour milling market, in collaboration with its US partner Bratney, at the IAOM Expo - Booth 309.
