BOMILL ENTERS INTO DISTRIBUTION AGREEMENT WITH I.P. GLOBAL TECH & MACHINERY FOR THE MEXICAN MARKET

BoMill AB (publ) expands its network in Americas through a distribution agreement with I.P. Global Tech & Machinery, a renowned supplier of processing equipment and services to the grain, food and seed industries in Mexico.

"In relation to our focus on flour milling and malting businesses, Mexico offers an attractive potential for BoMill. Partnering with I.P. Global Tech & Machinery, an experienced solutions provider in those targeted segments will help us accelerate the commercial development of BoMill InSight™ in the region. We are excited to collaborate and develop a long-term partnership.", commented Andreas Jeppsson, CEO of BoMill.

Established in 1988, I.P. Global Tech & Machinery is a leading provider of industrial automation and control products for the bulk industries, in particular grain, food and seed, in Mexico. Their solutions include dosing, mixing, grinding, screening, sorting, and packaging equipment from leading European brands.

"Our partnership with BoMill is a great opportunity to extend our portfolio with a solution that can support our customers, in further improving the quality of their products and their process. BoMill InSight™ is an exciting new equipment and we are keen to start introducing it to the Mexican market.", says Vittorio Cipelli, Director and Owner of I.P. Global Tech & Machinery.

BoMill InSight™ at a glance

BoMill InSight™ is BoMill's latest advanced grain sorting solution and the only one of its kind, capable of segregating kernel by kernel, at industrial speed (up to 15 metric tons per hour – 125,000 kernels per second), on grains' inner qualities such as protein content or fusarium contamination.

The equipment aims toward grain industrial companies with a sustainability agenda, willing to optimize their grain supply further, while enhancing the quality of their products. This includes grain producers (e.g. large cooperatives, grain elevators) as well as processors such as flour mills and malt producers.

The revolutionary modular approach of BoMill InSight™ offers maximum flexibility for operations and easy upgradability. Its smart frame design and compact footprint allow easy and rapid installation in new or existing grain processing lines. With its economic installation, operation, maintenance, and upgradability, BoMill InSight™ is also cost-efficient, allowing customers a fast return on investment.
