

FOR IMMEDIATE RELEASE:

New order: BoMill enters the Chinese market

The Swedish company BoMill AB can add a pin on their world map thanks to the first order from China. The Chinese noodle producer Xiangnian Food, number one in online noodles sales, has opted for BoMill's sorting solutions to remove DON from wheat and thereby improve the quality and value of their end products.

BoMill's cutting edge single kernel sorting technology by internal properties has previously been introduced in Europe and North America and now a new continent will benefit by improving Food Safety and Security. At 25,000 kernels per second BoMill can sort among others wheat, durum wheat, barley and spelt on parameters DON (fusarium), protein, vitreousness, seed quality and falling number.

Karin Wehlin, CEO at BoMill, says "We are very proud that we have been chosen by Xiangnian Food and hereby enter the Chinese market. Our technology will contribute to Food Safety and Security in the Chinese market - well in line with the UN Global Goals. This is a first step into the Chinese market, thanks to their incipient interest in our unique technology".

About BoMill

BoMill AB is a company with profound know-how within quality sorting of wheat, durum wheat, malting barley, spelt and oat using single kernel sorting technology. BoMill's head office is in Malmö, Sweden. The company sells quality sorting technology and know-how throughout Europe and North America, using its own sales organization or distributors.
